Easy chair & Ottoman  
By

**PRODUCT INFORMATION**

"The originality of the armchair is not only its ability to completely change the atmosphere of a lobby or lounge by simple means in the form of a seat and three different backs. But it also offers the possibility to easily change the upholstery and renew the armchair. As people work more in public places, the need for easy upgrades increases", says Daniel Debiasi.

Shift is an exceptionally flexible armchair, through the different heights of the backs, allows everyone to both focus completely on their work and to rest completely. The backrests can be replaced and renewed as needed, according to Offecct Lifecircle. It also offers architects tools to create sustainable solutions. The seat is the same for all three designs.

Shift is upholstered with frame in moulded cold foam and lacquered legs.

**Benefits & functions**

- Can be upholstered in fabric or leather.
- The backrests can easily be changed and renewed.
- Is an exceptionally flexible armchair with the possibility of three different heights on the backrest.

The frame is available in black, silver or white lacquer alternative in Offecct Flexicolor.
